

Aircon Energy Saver

from: EnviroTech Trading Limited

Price: £0.00

Date: 2019-11-17 00:57:48

Expiration Date: 0000-00-00 00:00:00

Description

Our “real time” Air Conditioning Energy Saving System called the AirCon Energy Saver (AES) is made in England and saves up to 30% of Air Conditioning Electricity Costs, also known as a Smart AC Controller. The AirCon Energy Saver System (AES) reduces AC Energy Consumption used by the Air Conditioning Unit compressor. The intelligent “real time” Smart AC Controller Energy Saving System analyses the “of coil” air temperature of the AC Unit with a bead temperature sensor. The AC Saver will stop the over cooling of the AC Unit and make very good savings on your Air Conditioning Units. The AES System is easy to install or retrofit by an Electrician or AC Technician and the Air Conditioning Energy Saver system can even lengthen the life of the Air Conditioning Unit Compressor. Therefore simply connect the EnviroTech Air Conditioning Energy Saver System and start reducing your AC Compressor run times cutting your Air Conditioning Energy Costs.
